

ABOUT THE WORKSHOP

Each one of us is a treasure trove of Talent. However, much of this talent is hidden. The hustle and bustle of our daily work life provides us with little or virtually no time to connect with this hidden talent. It requires conscious effort by each one of us to dig deeper and unravel the capability and possibilities that each of us have been born with. The (Self Discovery)⁸ workshop provides a focused opportunity to delve deeper into ourselves through a series of Psychometric Tests.

As we reconnect with 'who we are', we can explore strategies to become what we are capable of by leveraging this hidden potential as we move forward.

This program largely focuses on self-assessments using behavioral science frameworks that have evolved over the last eight decades across the globe.

PROGRAM OBJECTIVES

- To help you gain insights into '8' critical dimensions of your personality that have a huge impact on your professional and personal life
 - Your current level as indicated by 8 psychometric tests and the resulting implications for work effectiveness and personal growth
- Explore ways to use the outcomes of the 8 psychometric tests for effective self-management and decision making thereby helping you to enhance your effectiveness in the future

The course is based on the belief that certain competencies (attitudes, motives, values and qualities) are desirable for achieving success in the work life. It also draws upon considerable research evidence that supports this belief.
